The 13th International Conference on Interfaces and Human Computer Interaction (IHCl 2019) (part of the IADIS Multi Conference on Computer Science and Information Systems 2019) was hosted in Porto, Portugal, during 16-18 July, 2019.

This conference was organized by the International Association for Development of the Information Society (IADIS) and co-organized by ISEP – Instituto Superior de Engenharia do Porto.

This conference addressed the main issues of concern within Interface Culture and Design with a particular emphasis on the affective aspects of design, development and implementation of interfaces and the generational implications for design of human and technology interaction. This conference aimed to explore and discuss innovative studies of technology and its application in interfaces and welcomes research in progress, case studies, practical demonstrations and workshops in addition to the traditional submission categories.

This edition was published jointly with the 13th International Conference on Computer Graphics, Visualization, Computer Vision and Image Processing 2019 and 12th International Conference on Game and Entertainment Technologies 2019. These events received 216 submissions from more than 31 countries. Each submission was anonymously reviewed by an average of five independent reviewers, to ensure

that accepted submissions were of a high standard. Consequently, only 37 full papers were published. The overall acceptance rate corresponds to about 17 %. A few more papers were accepted as short papers, reflection papers and posters.

Extended versions of the best papers were selected to be published in:

the IADIS International Journal on WWW/Internet (IJWI). ISSN: 1645-7641

Besides the papers' presentations, these events also included a keynote presentation given by Prof. Paula Escudeiro, Institute of Engineering of Porto, Polytechnic Institute of Porto, Portugal and a tutorial by Prof. Rüdiger Heimgärtner.
