The **14th International Conference on Interfaces and Human Computer Interaction** (IHCI 2020) (part of the IADIS Multi Conference on Computer Science and Information Systems 2020) was held virtually due to the COVID-19 pandemic, during **23-25 July 2020**.

This conference was organized by the International Association for Development of the Information Society (IADIS).

This conference addressed the main issues of concern within Interface Culture and Design with a particular emphasis on the affective aspects of design, development and implementation of interfaces and the generational implications for design of human and technology interaction. This conference aimed to explore and discuss innovative studies of technology and its application in interfaces and welcomes research in progress, case studies, practical demonstrations and workshops in addition to the traditional submission categories.

This edition was published jointly with the 13th International Conference on Game and Entertainment Technologies 2020. These events received 118 submissions from more than 19 countries. Each submission was anonymously reviewed by an average of five independent reviewers, to ensure that accepted submissions were of a high standard. Consequently, only 20 full papers were published. The overall acceptance rate corresponded to about 17%. A few more papers were accepted as short papers, reflection paper and poster.

Extended versions of the best papers were selected to be published in:

❖ the IADIS International Journal on WWW/Internet (IJWI). ISSN: 1645-7641

Besides the presentation of papers, the conferences also included a keynote presentation given by Professor Chaomei Chen, College of Computing & Informatics, Drexel University, USA.
