The **16th International Conference on Interfaces and Human Computer Interaction** (IHCI 2022) (part of the IADIS 16th Multi Conference on Computer Science and Information Systems 2022) was held in Lisbon, Portugal, during **20-22 July 2022**.

This conference was organized by the International Association for Development of the Information Society (IADIS).

This conference addressed the main issues of concern within Interface Culture and Design with a particular emphasis on the affective aspects of design, development and implementation of interfaces and the generational implications for design of human and technology interaction. This conference aimed to explore and discuss innovative studies of technology and its application in interfaces and welcomes research in progress, case studies, practical demonstrations and workshops in addition to the traditional submission categories.

This edition was published jointly with the 15th International Conference on Game and Entertainment Technologies 2022. These events received 147 submissions from more than 24 countries. Each submission was anonymously reviewed by an average of five independent reviewers, to ensure that accepted submissions were of a high standard. Consequently, only 23 full papers were published. The overall acceptance rate corresponds to about 16%. A few more papers were accepted as short papers, reflection papers and posters.

Extended versions of the best papers were selected to be published in:

❖ the IADIS International Journal on Computer Science and Information Systems (ISSN: 1646-3692)

❖ the IADIS International Journal on WWW/Internet (IJWI). ISSN: 1645-7641

Besides the papers' and posters' presentations, the conferences also included a keynote presentation given by Professor Xiaoru Yuan, School of AI, Peking University, China.
